

## Erfahrungsbericht Auslandsstudium

### Angaben zum Auslandsstudium

- Partnerhochschule, Land: Escola d'Art I Superior de Disseny de Valencia, Valencia
- Zeitraum (WS / SS, Jahr): Winter semester/ 2015
- Fakultät und Studiengang: Innenarchitektur, Master Studies
- Name und E-Mail Adresse: Madara Steinberga, m.steinberga1@gmail.com

### Vorbereitung

- Planung, Organisation und Bewerbung bei der Gasthochschule  
During the application process everything went fine. In University web page incoming students can find an information in english about all kind of study fields and description about all subjects, that University offers. After applying for Erasmus semester, students have to wait about 2-3 months until get the final answer. International Office in Spain have already experience with students in abroad for a couple of years, that's way in my opinion organisation with documentation went well.

### Unterkunft

In Valencia, there is no student dormitories offered. Incoming students are looking for a room in shared flat. Usually students moving to Valencia and for the first days stay in hostel or use couchsurfing or Airbnb, what i did. We were 3 girls together from FH Rosenheim, that way for first 2 week we rent a flat and during this time we could visit a lot of flats and find the most suitable for us. Room usually costs from 150 – 250 eur, bills included. The price depends on flat location, but mostly students live in city center area or on the street, calls Blasco Ibanez. I had a chance to rent a flat together with students from Slovakia, Austria and Columbia. I am very satisfied with my choice to live in very international atmosphere and because of Columbian flatmate, i could learn spanish.

### Studium an der Gasthochschule

- Einschreibung, Belegung von Lehrveranstaltungen, empfehlenswerte bzw. nicht zu empfehlende Lehrveranstaltungen, Rückmeldung zum englisch-sprachigen Kursangebot, Bibliothek / EDV Anlagen / Mensa, Sport und andere Freizeitangebote
- University prepare for incoming students introduction day, when lectors introduce with themself with short description about study fields and explain students the organisation in University. Erasmus students have chance 2 weeks attending the classes without applying and after 2 weeks student have to give final decision and fill the learning agreement with final decision. It is important, because student can see, is there chance to communicate in english or only spanish, how is going to look final exam – more practical skills or theory.
- University offers Mensa and small library. Unfortunately university do not have any sport offers. But there is a lot of other chances in city to do. Can attend in other Univeristy sport activities, do some dance classes and as the weather is always so good, the easiest way is to some sport in huge Turia park or on the beach.

### **Alltag und Freizeit**

- Kontaktmöglichkeiten innerhalb der Hochschule / außerhalb der Hochschule
- Was man gesehen und getan haben sollte am Ort / außerhalb der Hochschule

In university is great chance to select a different kind of elective courses, for example, jewelry, calligraphy, ceramics, fashion design, what probably isn't possible to learn in home university. Teachers are very professional and helpful and in my opinion it is great chance to gain a new skills.

During Erasmus of course i suggest everyone to travel as much as possible, because each city and part of Spain is very different. It is useful to spend a lot of time together with spanish people, also classmates to get to know better culture and get the best tips, what to do in Spain.

### **Fazit**

z.B. beste und schlechteste Erfahrung / Sonstiges

Persons have to be prepared for spanish culture, sometimes people are not that good organised and punctual and probably more relaxed in some issues. But as faster you will accept it, more you will be able to enjoy their culture.
