Please submit in English or otherwise in German. Please share your experiences on the following aspects of your stay. The provided bullets below serve as a guide to describe your stay abroad, please replace and use your own words. Please keep a max. of 400 characters per box. Please send back as a docx.-file.

Stay details

Universita di Pisa, Italien
"Enabling Technologies, Opportunities and Research Challenges Ahead"

During the period 20th July 2022- 27th July 2022

Preparation

How did you prepare your stay?

The university website provided me all the information about the Erasmus program and summer school programs, through this I got to know about the summer course. This course is specially on Industry 4.0 which is the current technologies that are most used. As an Engineer knowing about the current technologies is a must.

Co-ordinator's from both the universities had help me to go through all the administration work in completion of my application.

Accommodation

How did you organise your accommodation?

Accommodation is organized by myself, I have shared my room with two other students from my university. It was located near to central railway station of Pisa.

Programme at host university

How did you learn during your stay at the host university?

Prof. Sergio Saponara is the Co-Ordinator of the program had made good orientation session, He gave the instructions about the course and helped us to get to know about the university and all the other staff from the university had also helped me during the course. With the help of the Id Card from the university, I had access to library and to the canteen, the food is really good and cheap, Eduroam application helped me to connect the Wi-Fi in most of the places while travelling.

The course gave me an idea of different fields of IoT devices and their applications in present market. I really recommend this course to my friends and the future students to take it.

Leisure activities

How was your leisure time and what did you do?

University had also offered us a tour to the Museum in Pisa and during the Leisure times, I travelled with other students to Florence and Viareggio city both are beautiful places. They are many international students in the course, we went out for dinners which was good and got to know many things.

Though Pisa, is very small city but it is filled out with 50,000 students so the city is very bright with the people which I love it, and the main attraction of the city is leaning tower of Pisa, they are few other parks near to the city to sit and relax.

Summary of the stay abroad

Overall, how do you look back on your stay abroad?

Through this course, I learnt many things from Industry 4.0. Which I don't know them before and got a full overview about how the things works. This application can really help me in my future projects. When I was talking with many students from different countries get to know about different experience from them.

Overall, the course was really good for the students both educationally and personal experiences.
